Team Pool Tracker

Fair games. Less chalkboard. More pool.

Team Pool Tracker takes the scribbling, arguing, and guessing out of running a team pool match. Open it on your phone, tap who showed up, and it builds a fair schedule for the day. It is free, it needs no account, and it works with no signal in the pool room.

Why managers like it

- **Everyone gets a fair turn.** It builds doubles pairings from whoever shows up, from 4 players to 15 or more, and balances who plays and who partners with whom.
- **Late arrivals are no problem.** Add a player mid-match, even someone not on the roster, and the app slots them into the games still waiting without wrecking anyone else's plan.
- **You stay in charge.** Swap any player, lock two partners together, unlock them later, or drop games when time runs short. The app suggests; the manager decides.
- **It keeps up with the clock.** A pace line says On pace, Ahead, or Running behind, based on how long games really take, so you know whether the last games will fit.
- **Scoring is two taps.** Tap Win or Loss for the table and the next game starts by itself. Made a mistake? Undo.
- **Paper when you need it.** Print a blank score sheet as a backup, then print or save a clean record of the match with names and results.

Built for a senior league

- **Big buttons, plain words.** One question per screen. No jargon and no pop-up boxes.
- **Nothing to sign up for.** No account, no password, no app store. Open the link and add it to your home screen.
- **Works without internet.** After the first visit it runs offline, so a weak signal never stops a match.
- **Your data stays yours.** Everything is stored on your own phone. Nothing is tracked or sent anywhere.
- **Easy updates.** One tap on Update now keeps the latest version, and your players and matches stay put.

Know where the team stands

- **Team stats, manager only.** Wins and losses, win percentage, best partner combinations, and home versus away results, behind a private PIN so there are no public rankings.

- **Practice matches.** Try a match out, or teach a new player the screens, without touching the real record.
- **Roster that stays tidy.** Mark occasional players as Subs, rename a misspelled name, remove a player for good, or make someone inactive and bring them back later without losing history.

Share it in seconds

- Send the roster to another phone by text message.
- Send the match results to the manager as a file, or text the score to the team.
- Hand the manager role to someone else when the time comes.

Quick glance

Cost	Free to use
Works on	iPhone, Android, tablets, laptops
Internet needed	Only for the first visit and updates
Accounts	None
Match sizes	From 4 players up to 15 or more
Game formats	Doubles, scotch doubles, singles
Printing	Blank score sheet and full match record
Privacy	All data stays on your own device
